EROS 24/7

Artist-In-Residence

01.09.26 – 06.09.26 · Châtel, Haute-Savoie (FR)

The coordinates of pleasure seem more clearly mapped than ever.
The market promises immediate access to what is desirable — an unlimited enjoyment.
At the same time, sex-positive spaces open new landscapes of satisfaction.

Yet both orders follow the same logic.
They chart Eros along the axes of identification, selection and training.
The subject appears to find a tailor-made place within them.

And precisely where the object seems attainable, the mystery disappears.

Desire has no goal — only detours.
Its object is never fully present, always already marked by lack:
a promise in the very act of vanishing.

Perhaps this is where the erotic truly resides —
not in possession, but in the in-between,
in the tremor between closeness and loss,
in the fold where absence takes form.

For five days and five nights we enter this in-between —
a place where art and bodies question one another.
Where seeing, hearing, touching, smelling and tasting
are not answers, but openings.

Here desire is not fulfilled, but composed —
as movement, as voice, as trace.

Structure and Process

EROS 24/7 is an experimental artist-in-residence program that establishes a shared workspace dedicated to the creation of erotic artworks.

Each participant brings their own artistic idea as well as the necessary tools to realise it.

We work around the clock within a triad of:

- individual expression
- participation
- reflection

Participants are invited to open their projects and actively involve others.
Shared meals and plenary discussions provide coordination, resonance and deepening of the work.

The works in progress are documented collaboratively in text, image, sound or video.
Publication, exhibition or commercial use is possible only with the consent of all persons involved.
The artists retain full authorship rights.

The shared workspace is based on mutual respect and voluntary participation. Each person determines their own degree of proximity, involvement and visibility — and may set or adjust their boundaries at any time without having to provide justification.
